Career Objective

Motivated and detail-oriented professional with a strong foundation in programming and exceptional problem-solving abilities, eager to leverage technical expertise in a dynamic environment. Committed to continuous growth and development while contributing to organizational success through innovative solutions and collaborative teamwork.

Interests

- Reading Books
- Playing cricket
- Gym
- Exploring new technologies

Project Experience

Student - Project- SQL Injection Attack Detection System
08/2021 - Current
Developed an SQL Injection Attack Detection System to identify and prevent malicious SQL queries by validating user inputs and detecting suspicious patterns. Implemented input sanitization, parameterized queries, and rule-based validation to enhance database security and protect against unauthorized data access. The system improves application reliability by reducing SQL injection vulnerabilities.
